

04th January 2019

TO THE RESIDENT

Neo Infrastructure (SA) has been contracted by the City of Victor Harbor to construct a wombat crossing on Agnes Gillespie Drive adjacent to the school entrance. This is either adjoining your property or within proximity. Civil construction works to be undertaken during this project include road demolition and reconstruction, concrete kerbing, stormwater works, electrical lighting, wombat crossing and new paving. The working times will be between 7am to 5pm on Monday to Friday.

The project will commence Mid-January (10th), with an anticipated completion date in early to Mid-February, weather pending.

There will be ongoing traffic management during the construction period. Necessary road closures will occur, and detours will be in place, with access to school and Aldi granted where possible.

Neo will make every endeavor to minimize inconvenience to the local residents. We respectfully request that the temporary restrictions are acknowledged during the short construction period and care is taken in the vicinity of plant, equipment and personnel working in the area.

Please feel free to call the NEO Project Manager, Donald Winter, via the contact details below if you have any queries or would like further information.

Yours Sincerely

Donald Winter
